

Be sure to show all of your work and label your answer. Do your best thinking!

1 At her fruit stand, Jamie sells apples for 10 cents each. One day she sold three fourths of her apples and had 15 apples left. How much money did she make on the apples she sold?

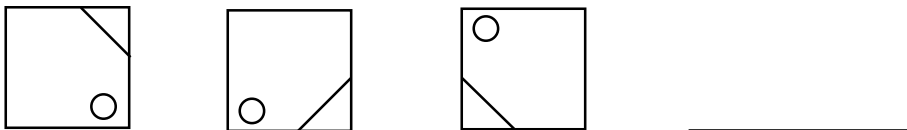

2 How can you draw lines to join A to A, B to B, and C to C so that the lines do not cross one another?

3 What numbers should be put in the boxes to complete the addition problem?

$$\begin{array}{r}
 4 7 \\
 + 9 \\
 \hline
 1, 1 1 5
 \end{array}$$

4 Draw the next figure in the pattern.

5 The Cougars basketball team played three games against the Bobcats. In the games, the Cougars scored a total of 197 points, and the Bobcats scored a total of 174 points.

Did the Cougars win all three of the games?
